PROFESSIONAL SUMMARY

First Class Business Information Systems graduate with hands-on experience in SQL, Python, Power BI and Excel. Skilled at cleaning and modelling datasets and turning them into clear dashboards and insights for non-technical stakeholders, backed by an Accenture data analytics simulation and self-directed analytics projects. Currently studying an MSc in Data Science and Analytics at Brunel University London and seeking a full-time Junior Data Analyst role to apply and extend these skills. Strong commercial awareness built through customer-facing roles at Apple, Samsung and McDonald's.

TECHNICAL SKILLS

Analysis & Visualisation: Data cleaning, data modelling, dashboards and reporting (Power BI), R Studio
Databases: SQL (Oracle) – querying, filtering, aggregation, database design and development
Programming: Python, R, SQL, HTML
Excel: Pivot tables, XLOOKUP/VLOOKUP, charts, data cleaning and filtering
Ways of Working: Agile fundamentals, project management, requirements analysis, stakeholder communication
Languages: English, French, Dutch

DATA EXPERIENCE & PROJECTS

Junior Consultant (Trainee) – Scale Factory **Nov 2025 – Present**

- Trained in SQL scripting and in SQL and NoSQL databases, alongside data types, APIs and three-tier architecture (HTML, CSS, JavaScript, frameworks and libraries)
- Completed consultancy training in Scrum and Agile methodologies, requirements analysis, change management and embedding quality
- Built programming foundations across imperative, procedural and object-oriented approaches, with hands-on practice
- Developed professional skills in leadership, problem-solving, communication, self-awareness and teamwork

Data Analytics & Dashboard Project (Self-directed) **2026**

- Extracted raw data from web sources and cleaned and transformed it to ensure accuracy and integrity
- Structured the data and wrote SQL queries to filter, aggregate and analyse complex relational data
- Built interactive Power BI dashboards and Excel reports (pivot tables, advanced formulas) to show key performance trends and metrics
- Turned raw data into clear visual insights designed to answer specific business questions

Accenture – Data Analytics & Visualisation Job Simulation (Forage) **June 2024**

- Cleaned and structured datasets to improve data accuracy and usability
- Analysed data to identify patterns and trends that support business decisions
- Carried out requirements analysis to understand the business problem, then built visualisations to present findings clearly to stakeholders

Library Database System – De Montfort University **2024**

- Designed and built a relational library management database in Oracle, with tables, relationships and structured user and book records
- Wrote SQL queries to retrieve, filter and manage data, applying data modelling principles for accurate storage

EDUCATION

Brunel University London **2026 – 2028**
MSc Data Science and Analytics (in progress)

- Developing skills in statistical analysis, data interpretation, problem solving and data-driven decision making

De Montfort University, Leicester **2022 – 2025**
BSc (Hons) Business Information Systems – First Class Honours

- **Dissertation:** Exploring the feasibility of AI-powered predictive diagnosis for infectious diseases in the Guinean (Conakry) healthcare sector – First Class
- Modules: Programming in Python, Data Analytics and Statistics, Information Systems Analysis and Design, Social Computing and Data Analytics for Computing, Information and Database Development, Integrated Project

The College of Richard Collyer, Horsham **2020 – 2022**

- A Level French (C); BTEC Information Technology (Distinction); BTEC Business (Merit)

Oriel High School, Crawley **2015 – 2020**

- 8 GCSEs at grades A–C including Mathematics and English Language

WORK EXPERIENCE

Front of House Member – Nando's, Gatwick Airport **Jun 2026 – Present**

- Communicate clearly with a wide range of customers in a high-volume environment, resolving order queries quickly
- Work with front-of-house and kitchen teams to keep service smooth at peak times

Customer Service Advisor – Samsung Experience Store, Leicester **Apr 2025 – Jun 2025**

- Met and exceeded a weekly sales target of £4,000, contributing to the store-wide target being raised
- Helped lift customer satisfaction scores by 25% through tailored product recommendations and hands-on demonstrations

Specialist – Apple, Leicester Highcross **Aug 2024 – Jan 2025**

- Built detailed product knowledge that increased upsell opportunities and sales, and supported the UK launch of Apple Vision Pro
- Monitored stock and order systems and reconciled discrepancies between sales and system data

Crew Member – McDonald's, Crawley **Jun 2021 – Present**

- Trained new team members, improving onboarding efficiency
- Served 200+ customers daily and handled cash and card transactions, balancing tills accurately
- Contributed to a 15% increase in customer satisfaction scores through teamwork and high standards of service
